

The [unclear] [unclear] Albert
Michael

P. 1

M A Dear Heartland Institute,

My name is Albert [redacted] along with my partner Michael [redacted]. We go to David A. Brown middle school, in Wilton, California. We've read 10 articles we will tell you six of them and describe to of them to you.

We have read some articles and we will tell you about them so that you will maybe stop what you are doing. The following articles we've read are: Air pollution shrinks fetus size, 31 states target global warming, World must fix climate in 10 years - UNDP, Natural disasters have quadrupled in two decades, and Global warming Denier Group funded by Big oil Hosting Climate Change Denial conference. We will describe "Air pollution shrinks fetus size" this article explains that if a mother has a higher exposure to exposure to air pollution had fetuses that were, on average smaller in terms of abdominal circumference. The next one we will describe is, "Natural disasters have quadrupled in two decades", in this article it explains that floods have occurred in South Asia, across the breadth of Africa and Mexico that have affected 250 million people, plus, Floods and windstorms (hurricanes, tornadoes, and typhoons) have increased from 60 events in 1980 to 240 years last year.

The next article is: 31 states target global warming, we will now explain it to you. Led by California, 31 states representing more than 70% of the U.S. population announced that they would measure and jointly track greenhouse gas emissions by major industries. The most important part of the new registry is subjecting emissions statistics to third-party verification, unlike a Bush Administration program that does not require verification.

The next article is: the world must fix climate in less than 10 years. This article explains: Climate change threatens to condemn millions of people to poverty. Climate disasters between 2000 and 2004 affected 262 million people, 98% of them in the developing world. The poor are often forced to sell productive assets or save on food, health, and education, creating "life-long cycles of disadvantage."

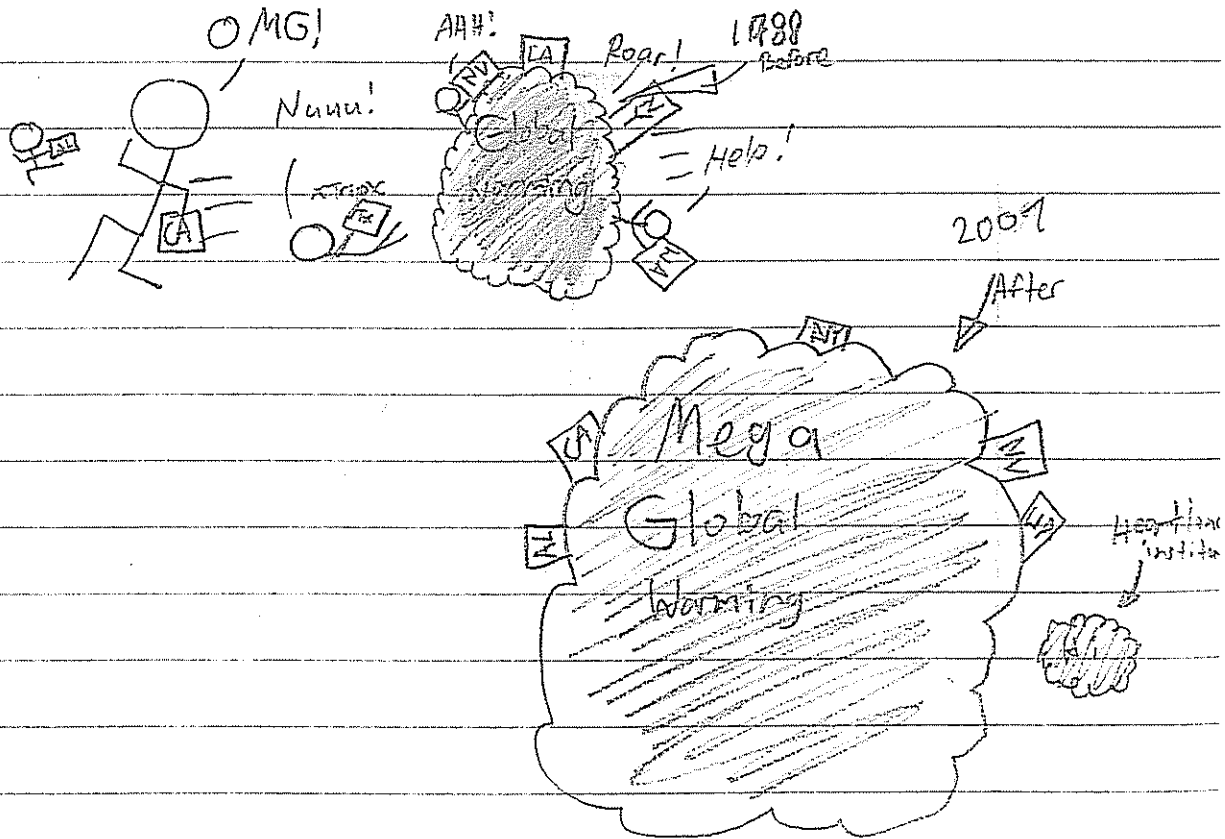

We are now going to give our opinion on how we feel about your business. I do not think that what you are doing is right because you are telling people that global warming is not a crisis. If this is not a crisis, how come floods have occurred in Asia, Mexico, and India. Plus, how can you explain why the glaciers are melting, they can't melt themselves, because they are in the coldest region in the world.

A

This is what you should do with your \$800k. I think you should donate \$100k to charity, 2nd, You should tell people that Global warming is a crisis by Advertising on billboards and on T.V. 3rd, you could donate to the research of finding a cure for diabetes. Thank you for reading this letter and I hope you will change your mind,

Sincerely,
Albert
Michael

P.S: Don't make the same mistake again!!

I am a boy and I come from somewhere. I'm not going to tell you where I live because I don't want you to come and kidnap us. Just kidding!!! We are going to tell you about global warming. I don't care if you don't want to read, but I'm making you read it you horrible people.

We read 10 articles including yours. Our first article is about natural disasters quadrupling in the past 2 decades because of GLOBAL WARMING. I'm going to skip over to article #3 that we have read. It is about diesel traffic making asthma worse which leads to GLOBAL WARMING. Article #7 is about air pollution can shrink the size of a fetus which is very bad. Our tenth article is about you people trying to talk everyone into not believing in global warming. Instead of using the \$800,000 to pollute the world, you should use it to help the world. You will also still have the \$800,000!!!

I am very unhappy with your disgracing actions to the world, because you guys and woman are trying to hide the facts about Global warming so you can make more money. Well you guys aren't going to fool anybody except yourself. The reason is because if you were to look at a picture of Glacier National Park 50 years ago, you would see that there is less ice now then there was fifty years ago.

What do you want to do with the money? Well I don't really care but I would suggest helping the environment. If you guys help the environment you could be famous. You could be on the front of the news paper.

Sincerely,
Brock
Anas
Kyle

Heartland Institute,

We are 6th grade students at David A. Brown Middle School.

Our names are Danielle & Samantha, we are 12 years old. We are going

To EXPLAIN to you that global warming is NOT a myth.

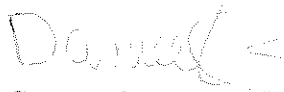

We are going to tell you about GLOBAL WARMING articles that we read in school. Did you know that natural disasters have QUADRUPLED in 2 decades? This year people have seen floods in South Asia, across the breadth of Africa and Mexico that have affected more than 250,000,000 people! Did you know that diesel traffic makes asthma worse? A total of 60 adults half with mild asthma and half with moderate asthma, walked for 2 hours along Oxford street, where only buses and taxis are allowed, and then on a separate occasion walked for 2 hours in traffic free Hyde park. Did you know that if the climate doesn't decrease in the next 10 years it will be at a non living point? Air Pollution Shrinks Fetus Size, if pregnant women inhale too much pollution, the baby will shrink and everything will be smaller.(not good)

We feel that it is wrong what you are doing. We know that you know that global warming is NOT we repeat NOT a myth, And we think it is selfish that you would take money over yours and your peers lives.

In the future (after reading this letter) we would like you to use that \$800,000 to actually help clean the environment, so we can live in a stable environment. If you don't do this the world will be in trouble, and when it is don't ask for help because we told you so.

Global Warming Believers,

Danielle

Samantha

(P.S. GLOBAL WARMING EXCISTS)

Hi, I'm Bret I live in CA Lake Elsinore. My friend Pedro & I are writing to you to tell you about G.W.

I've read 10 articles about G.W. I'll list four of them; Natural disasters have quadrupled in 20 years, 53 bird species face extinction, World must fix climate in 10 years, Air pollution shrinks fetus size. THIS IS CAUSED BY GLOBAL WARMING!!!

I think your fools for denying G.W. you know it could kill us all & you're just adding to it.

I want you to help stop G.W. not increase it.

From,
Bret&Pedro

Dear Heartland Institute,

We are students from David A. Brown Middle School. Our names are Aida [REDACTED] and Alexis [REDACTED]. What we are going to tell you is that Global Warming is a crisis and you should help Global Warming instead of making it worse.

In the past couple of months, we have read articles about Global Warming and we know facts about G.W. The 1st article is Diesel traffic makes asthma worse. The article explains that diesel traffic can worsen lung function in people with asthma. The 2nd article is Air pollution shrinks fetus size. This means that if mothers have higher exposure to air pollution, the child's fetus will shrink. The 3rd article is World Must Fix Climate in Less than 10 years. This means that if we don't fix the climate, everything will be destroyed and we won't be able to survive. Those are all the important articles we read.

In this paragraph, we are going to explain to you how we feel about what you are doing. We feel upset because you are making Global Warming worse instead of helping it. We know that almost half of the country knows that G.W. is a crisis. We know that you could help the environment with the \$800,000 you have.

This is what we want you to do. With all the money, help the environment instead of making it worse. Another thing is help the people who are affected by G.W. those are the 2 reasons why you should help the environment. We hope you make the better choice.

Sincerely,

Alexis [REDACTED]

&

Dear Heartland,

Hi my name is Micaela. This is my friend Emily. We both go to David A. Brown Middle school. We are writing this letter to you from our first period exploratory class. Our teachers name is Mr. Steria.

We've read article about global warming. And we know all the facts. Some of the articles we've read are, natural disasters and how they have quadrupled in the last two decades. The other was about how air pollution can shrink a fetus size.

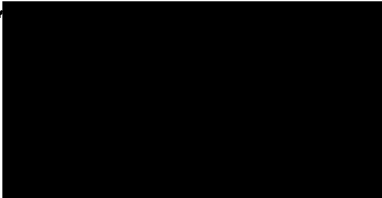

We know that you received \$800,000 dollars from the Exxon mobile oil company. We don't think its very smart of you to take \$800,000 dollars to get other people to think that global warming is not true. Global warming is very bad for our earth, and people like you are making it worse. Global warming is very dangerous. But it is a very important thing going on.

Instead of using the 800,000 dollars on dumb things, you should us it to sell/buy hybrid auto parts. You could also put that money towards a fund for schools and ect ... You could also put on a play for kids about GLOBAL WARMING so they can understand it too!!! Well please write back soon.

Sincerely,

Micaela [REDACTED] Emily [REDACTED]

Micaela

Dear Mr. Behar,

In this essay I will tell you one way how to improve David A. Brown Middle School. In the next paragraph I will tell you one way.

I think one way to improve this school is to have more P.E supplies such as basketballs, volleyballs, and soccer balls. In the following paragraphs I will give you two reasons I chose this.

One reason is sometimes people get discouraged that there aren't enough basketballs to play with. This is one reason there should be more P.E supplies.

My second reason is people can play with there friends instead of other people. If the group of friends cannot find another basketball, for example, they are forced to play with people they may don't know.

One day my friend forgot to bring a basketball to school, so at break we went to get a ball from the bin. But, there weren't any basketballs left in it. So we had to play with the 7th and 8th graders.

What happens if people fight over basketball courts? What if they begin to start a fight?

If people fight over court, one solution is that they can share the court half-half. It would be a good time to learn how to share.

I think one way to improve this school is to have more P.E supplies such as basketballs, volleyballs, and soccer balls. In the paragraphs you just read, I gave examples why this is a good idea.

Steven

Jacob

Perl, Mr. Steer

Dear Hartlands Institute,

We are 2 six graders that attend David A Brown middle school in Wildomar Ca. Are names are Steven [redacted] and Jacob [redacted]. Are class has read lots of stories-articles about global warming. Now we both are going to tell you the important of global warming.

As we told you we read plenty of articles. But now we would like to list 3 of them, and say one important fact for each one.

1. Air pollution make a fetus size small. Scientist say that where more air pollution is at, may cause problems to women in labor. 2. Diesel traffic makes asthma worse. Kids with asthma might die from diesel chemical. 3. Natural disasters have quadrupled in two decades. During these year Asia, South America had harsh full floods.

We feel that you are a disappointment because you are telling lots of people that global warming does not exist. That's

Our Personal opinion is that if you
could care a little about global warming.
Also if you could Spend your money
wisely to do something good for
Mother Earth.

P.S. Thank you for reading our letter.

Sincerely,
Steven [REDACTED]
Jacob [REDACTED]

Dear Heartland Institute,

We are students from David A. Brown Middle School. Our names are Jazlyn [redacted] and Jazlyn [redacted].

We are learning about Global Warming and would like to tell you some articles we read. Articles we read we chose is Warnings and effects of Global Warming.

These are the articles that warns us ^{about} "C.W. Final wake up call? World must fix climate in 10 years. Then here are the effects of C.W. Diesel traffic makes asthma worse, next one is Air Pollution shrinks Fetus size, and Natural disasters have quadrupled in two decades.

We feel that they are destroying our planet by saying C.W. is not a crisis. You think C.W. is not a crisis, but it is, you know deep down that it's a real thing that's happening. Everyone has a part in helping C.W. and you're making worse.

What we want you to do with the \$800,000 you have is to donate the to schools that need money, funds, and to help the environment.

We please help (GW) by stop saying
GW is not a crisis. Even though we're
kids we're cautious about Global Warming.

Bye,

Mrs. [REDACTED]

Jayden [REDACTED]
